

MEET BABY DYLAN

HIS MIRACULOUS STORY

A woman contacted our international chatline when she was 4 months pregnant. She had already taken pills. We encouraged her to seek medical care. "Doctors" told her she had an ectopic pregnancy, that her baby was not alive, and charged her to do a D&C. She was heartbroken.

LET'S NOW FAST FORWARD A FEW MONTHS TO WHEN MOM RESPONDED TO US

First I just want to thank you so much for your prayer, God did wonders to me, my child is alive and right now I have a bouncing baby boy even though he is not mature enough

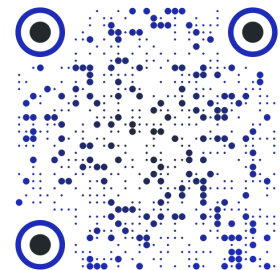

I gave birth before visiting the pregnancy center, later I realized that the doctor was lying to me that I have an ectopic pregnancy just to benefit from me but I thank God for his miracle

Dylan was born prematurely but is doing well. It is anticipated that he will spend about 3 weeks in the NICU. We aren't sure what procedure (if any) was actually done on the mother!
